

ZINC PORTFOLIO

Zinc is an essential trace element that is vital for our immune system. It functions as a cofactor for numerous enzymes, including those involved in DNA and RNA replication, protein synthesis, insulin production and brain development.

Despite the importance of this mineral, our bodies cannot store excess zinc as it naturally does with some other minerals and vitamins, so continuous dietary intake is required.

APPLICATIONS

PERSONAL CARE

BEVERAGES

INFANT

NUTRACEUTICALS

FUNCTIONS

- + Soluble Zinc
- + Preservative
- + Zinc fortification
